<b>Office Action Summary</b>	<b>Application No.</b> 10/580,849	<b>Applicant(s)</b> ARISAWA ET AL.	
	<b>Examiner</b> Jessica Han	<b>Art Unit</b> 2838	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 26 May 2006.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Drawings***

1. Figures 36-42 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 24, 33, 42, and 47 are rejected under 35 U.S.C. 102(a) as being anticipated by the acknowledged prior art as shown in figures 36-42.

The acknowledged prior art discloses an apparatus for generating a three-phase pulse-width-modulation signal for a three-phase voltage inverter employing a semiconductor switching element, the apparatus comprising: a generating unit that generates the three-phase pulse-width-modulation signal based on a combination of three basic voltage vectors and at least one or two zero vectors and a combination of three basic voltage vectors and two zero vectors. Given the

broadest reasonable interpretations, "a combination of" recited elements do not set forth any structure which is different from the structure disclosed by the acknowledged prior art.

4. Claims 24, 33, 42, and 47 are rejected under 35 U.S.C. 102(b) as being anticipated by Xu et al (5,552,977).

Xu et al discloses an apparatus for generating a three-phase pulse-width-modulation signal for a three-phase voltage inverter employing a semiconductor switching element, the apparatus comprising: a generating unit that generates the three-phase pulse-width-modulation signal based on a combination of three basic voltage vectors and at least one or two zero vectors and a combination of three basic voltage vectors and two zero vectors (see figures 1-3). Given the broadest reasonable interpretations, "a combination of" recited elements do not set forth any structure which is different from the structure disclosed by the Xu et al.

***Allowable Subject Matter***

5. Claims 25-32, 34-41, and 43-46 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

7. Ho (7,102,327), Watanabe et al (5,657,217), and Sugishima et al (5,214,575) teach the use of voltage vectors and zero vectors to control the three phase inverter circuit.
